Amendments to the Specification:

Please replace the last paragraph on page 4 which extends onto page 5, lines 25-33 on page 4

and lines 1-2 of page 5, with the following amended paragraph:

The elevator plate 202 includes three fixed cam lifters 210-212 that surround an outer collar

214. This mates with an inner collar 216 on the triple-lobe cam 204. Three identical cam lobes 218-

220 match the distribution of the distribution fixed cam lifters 210-212. The triple-lobe cam 204 is

intended to rotate relative to the elevator plate 202, and this rotation will cause elevator plate 202 to

smoothly rise and fall. The three fixed cam lifters 210-212 provide a three-point support to maintain

the parallel plane alignment of the top surface of elevator plate 202 with a base 222.

Please replace the second full paragraph on page 5, lines 19-21, with the following amended

paragraph:

The multiple-lobe cam and cam lifters can mutually provide flat spots 240-244 on which to

rest at minimum and maximum heights of elevation of the elevator plate.
